

Section: Narratives - Needs Assessment

Introduction

The findings of a recent study showed that there is a significant benefit to students who participate in out-of-school-time (OST) programs. In fact, the [Return on Investment of Afterschool Programs in Pennsylvania](#) study determined that for every dollar invested in after-school programming for students there was a return of \$6.69 in potential benefits to students, including reduced rates for drop-outs, teen pregnancy, substance abuse, crime and delinquency ([Link to PSAYDN.org](#)).

In accordance with the American Rescue Plan (ARP) Act and Pennsylvania Act 24 of 2021 (Act 24), the Pennsylvania Department of Education (PDE) will award approximately \$50,000,000 or one percent (1%) of Pennsylvania's ARP Elementary and Secondary School Education Relief (ESSER) State Reserve funds to support school districts, charter schools and cyber charter schools (collectively, LEAs) in the development and implementation of comprehensive after-school programs to address learning loss in response to the academic, social, emotional and mental health needs of students and subgroups of students impacted by COVID-19 public health emergency that supplement school programs and activities.

Act 24 requires that, when available, existing personnel shall be utilized by school districts, charter schools and cyber charter schools to staff programs and activities established with these grant funds.

Within 90 days of receipt of these allocations, school districts, charter schools and cyber charter schools must submit a three-part plan to PDE, that outlines the proposed use of the grant money, itemized by program and activity. This plan is part of a consolidated application that includes after-school programming, summer programming, and a comprehensive plan to address learning loss. The plan shall include:

- 1) A description of each program and activity
- 2) A narrative outlining the expected benefit of each program and activity
- 3) A budget for each program and activity detailing personnel and operating costs

PDE has developed the Accelerated Learning Toolkit, a significant cadre of resources and trainings, to support LEAs in the development of their plans. The Accelerated Learning Toolkit can be found [Link to Accelerated Learning Toolkit](#).

Needs Assessment: In this section, LEAs are asked to describe the impact of the pandemic on their students, examine disproportionate impacts on specific student groups, and highlight the LEA's promising practices in supporting students' needs since March 2020.

Indicators of Impact

1. Describe how the LEA identified students for inclusion in after-school programming. Include a brief description of the indicators used in the decision-making process.

Students were identified for after school programming based on several criteria. At the simplest level we tasked teachers to provide information on students whose academic performance based on teacher assessments, attendance and class participation demonstrated a notable need for additional intervention over and above that which could be provided in the regular school day. When we had data from a competent assessment system or test this data was also taken into account. Finally, for all students parents and guardians were surveyed to see if they felt that their child was in need of additional assistance.

Section: Narratives - After-school Program

After-school Program Questions: In this section, LEAs are asked to describe the activities they have designed to provide after- school programming for their students.

2. Identify the target student-group for the summer school program. Will the focus be on academic growth, social and emotional wellness, or some other factor to support student growth? For each group, provide specific strategies that were used or will be used to identify and measure impacts.

Student Group	Area of Focus	Number of Students Served	Provide specific strategies that were used or will be used to identify and measure impacts
Major Racial and Ethnic Groups	Academic Growth	400	We will utilize assessment tools that provide real time feedback to students on the progress they are making and, when available, their overall gains towards a proficient level of learning.
Children with Disabilities	Academic Growth	100	Instructional strategies used will align closely to the goals of the student's IEP and will also be consistent with the progress monitoring practices already in place.

3. Describe the evidence-based resources that will be used to support student growth during the after- school program.

Our after school programs will rely on the validity of the assessment tools we have selected for each core content area. Each assessment tool has been selected for its alignment with PA Core standards and for its ability to provide diagnostic data and prescriptive learning pathways for each student. We will also ensure that teachers in the after school program provide additional individual remediation when needed for students either individually or in small groups or learning centers.

4. Describe the staff that will provide the after- school program (i.e., Internal staff or outside resources).

Number of Staff Members	Internal/Outside Provider	Role
60	Internal	This number represents a maximum number of staff members who will be present and will depend on the success of the District's recruitment and retention efforts. This number also includes both campuses of the District

a. The LEA assures it understands it is responsible to offer the work to its internal employees prior to engaging outside entities.

b. The LEA assures it understands it is responsible to ensure that all after-school program staff hold the appropriate certifications for the program that is being delivered.

5. How will the LEA assess the success of the after-school program? Please identify the tool, frequency of use, and expected results.

Tool Used to Evaluate Success	Frequency of Use	Expected Results
Ascend Math Diagnostic Assessment	Monthly	By the end of the 21-22 school year we expect to see students performing mathematics tasks appropriate to their grade level 70% of the time
		By the end of the 21-22 school year we expect 60% of our

Tool Used to Evaluate Success	Frequency of Use	Expected Results
Renaissance ELA Assesment System	Every 9 weeks	students to be able to score at or above proficiency as measured by appropriate Keystone Assessment

6. How will the LEA engage families in the after-school program?

Principals and teachers send out regular summaries of work being done by students. Where there is a prescriptive intervention system in use, the data from these systems will be added to our Student Information Systems. These are available to parents at any time and can be viewed by parents when desired.
